

Saikiran Kandhi

Azure & AI Automation Specialist

PROFILE

Microsoft Azure & Power Platform specialist with 9 years of experience delivering end-to-end automation solutions for global enterprises. Deep expertise in Azure, Power Apps (Canvas & Model-Driven), Power Automate, Copilot Studio, PCF development, Azure integration, and SPFx. Proven record of building AI-powered automation for Fortune 500 clients, mentoring junior engineers, and leading technical innovation in Power Platform and Azure cloud solutions.

EDUCATION

- BSc in Computer Science
- Giriraj Govt College Autonomous (Affiliated to Osmania University)
- 2010 – 2013

SKILLS MATRIX

- **Azure & Cloud:** Azure Logic Apps, Azure Function Apps, Azure App Registrations, Microsoft Graph API, AI Builder , Azure Custom Vision, Azure Service Bus , APIM
- **Power Platform:** Power Apps (Canvas & Model-Driven), Power Automate, Dataverse, Copilot Studio, PCF (TypeScript)
- **SharePoint:** SharePoint Online, SPFx Web Part Development, CAML Query Optimization
- **Integrations:** DocuSign, FreshService, Power Query Scripting, Excel Online, OneDrive
- **Development:** TypeScript, Python, HTML, CSS, JavaScript, SQL, Bootstrap

CERTIFICATIONS

- **PL-900** – Microsoft Power Platform Fundamentals
- **PL-400** – Microsoft Power Platform Developer

EXPERIENCE

Azure & AI Automation Specialist | Svrarapps Technologies

Mar 2025 – Present

- Delivering end-to-end automated solutions for global clients.
- Leading Power Platform, Azure integration, and SharePoint intranet development initiatives.
- Conducting PCF and Copilot Studio training programs; mentoring junior engineers on real client projects.

PowerApps Developer | Yash Technologies

Nov 2022 – Feb 2025

- Developed custom Canvas and Model-Driven apps to improve business processes and enhance operational efficiency.
- Automated repetitive tasks using Power Automate, reducing manual effort significantly.
- Managed Dataverse for smooth integration between systems and organized data storage.
- Built AI-powered Chatbot using Copilot Studio with Agentic Flows and Generative Answers from live data sources.

Application Developer | TEKsystems

May 2020 – Oct 2022

- Created custom Power Apps applications to enhance workflow and business process efficiency.
- Leveraged Power Automate to streamline and automate manual business tasks.
- Managed Dataverse ensuring secure and easily accessible data for applications.

Ola Play Sr. Executive | ANI Technologies (Ola)

Apr 2017 – Nov 2019

- Conducted inventory planning for smooth operations using Excel.
- Managed vehicle/partner status using the Inventory Management System (IMS).

KEY PROJECTS

Oracle–Icertis CLM Integration Automation

Technologies: Azure API Management, Azure Service Bus Topics, Azure Logic Apps (Stateful), Oracle Integration Cloud (OIC), Oracle, Icertis CLM REST APIs, Microsoft Graph API, Azure Key Vault

Role : IT Consultant | Delivered

- Worked on Oracle-to-Icertis master-data integrations for Customer, Supplier, Organization, Supplier Item, and Legal Entity records. Built Logic App orchestration to validate, transform, create, update, activate, and deactivate supplier records in Icertis using REST APIs.
- Developed Icertis-to-Oracle integrations for Project, Contract, Program, and BPA creation processes.
- Created and configured Azure Service Bus topics and subscriptions for reliable message-based integration between Oracle and iCertis.
- Developed Azure API Management APIs to securely expose and manage integration endpoints.
- Implemented APIM inbound policies for request validation, authentication, header transformation, and routing messages to Service Bus topics.
- Implemented APIM outbound policies for response transformation, status-code handling, and standardized error responses.
- Implemented integration scenarios for Icertis Wave sight, RFC, Service Provider Statement of Work, and amendment agreements.
- Supported integration testing, error analysis, and deployment coordination.
- Added error handling, retry/dead-letter processing, workflow monitoring, and automated HTML email alerts through Microsoft Graph API.

Document Rebranding Automation

Technologies : Python, VS Code, Azure Function Apps, Power Automate, SharePoint, Microsoft Graph API and Logic Apps

Role : IT Consultant (Co-Pilot) | Delivered

- Developed a Python script to automatically detect and replace the old company logo with the new branding across all PDF documents in SharePoint.
- Integrated Azure Function Apps to run Python processing at scale across hundreds of documents.
- Power Automate orchestrates the workflow trigger, progress tracking, and sends completion notifications.
- Graph API used for SharePoint document library access and file read/write operations at scale.

Neutralization Agent – Invoice Automation

Technologies : Power Apps, Power Automate, SharePoint, Azure Logic Apps, Azure Function Apps, AI Builder, Fresh Service Workflow Automator, OneDrive, Premium Connectors

Role : IT Consultant (Co-Pilot) | Delivered + Live in Production

- Reduced vendor invoice processing time from ~20 minutes per document to a few seconds by building a fully automated end-to-end pipeline.
- Built FreshService Workflow Automator to fetch invoice attachments from tickets and trigger Power Automate via Webhook and HTTP connectors.
- Used AI Builder with configured prompts to intelligently extract chemical attributes from multi-format vendor PDFs and Excel files.
- Generated WEGO-formatted Word and PDF documents automatically using Azure Logic Apps and Function Apps for backend processing.
- Developed a multi-screen Canvas Power App (accessible via Teams) for upload, real-time processing status, and download — all within a single interface.
- Automated notifications at every stage of the document lifecycle to keep stakeholders informed.

Sales Order Report Automation

Technologies : Power Automate, Power Query Scripting, Excel Online, SharePoint

Role : IT Consultant (Co-Pilot) | Delivered

- Automated conversion of a single Sales Order Excel sheet into multiple department-specific formatted sheets, eliminating all manual copy-paste work.
- Power Automate flow reads incoming Outlook emails by subject line, picks up the source file, and triggers Excel script processing end-to-end.
- Applied business logic using Power Query scripting to filter, transform, and distribute data with correct formulas and formatting across output sheets.
- Final multi-sheet workbook automatically stored in SharePoint for access by relevant teams.

SharePoint Intranet Enhancements

Technologies: Azure App Registrations, Power Automate, Microsoft Graph API, SharePoint Online, SPFx

Role: SharePoint Intranet Support | Delivered

- Migrated Active Directory to SharePoint sync from deprecated PowerShell to Azure App Registration (Client ID, Tenant ID, Client Secret) with automated weekly sync via Power Automate and Graph API.
- Resolved UI rendering issues across the intranet and restructured CAML queries with indexing and pagination to overcome the SharePoint 5,000-item list threshold.
- Deployed 4 versioned SPFx releases with feature enhancements and critical bug fixes across each release.

Impact Tracker

Technologies: Power Apps, Power Automate, SharePoint Online, SPFx

Role: PowerApps & SharePoint Developer | Delivered

- Designed and developed a robust project tracking tool with a dynamic heat map visualizing project statuses with interactive tooltips and advanced filter options.
- Customized SharePoint Online using SPFx for enhanced functionality and seamless integration with Power Apps.
- Developed Canvas and Model-Driven apps to meet complex business requirements, ensuring scalability.
- Automated workflows with Power Automate, reducing manual intervention for repetitive tracking tasks.
